WinAir

ABOUT US

WinAir has over 35 years of experience as a leader in aviation management software and is the top pick for organizations concerned with reliability, compliance, and having access to data that they can trust. Companies worldwide rely on WinAir to efficiently and effectively track and manage aircraft maintenance and inventory control.

With Winair, you will have confidence in your maintenance records while you:

- CONNECT DEPARTMENTS
- IMPROVE EFFICIENCIES
- EXPEDITE PROCESSES
- INCREASE PROFITABILITY

SERVING OVER 30 COUNTRIES

15,000 END USERS

9000+ AIRCRAFT TRACKED

WHY WINAIR?

At WinAir, aviation isn't just our business - it's our passion. Our aviation management software puts maintenance compliance on autopilot, so you can focus on what matters most: keeping your aircraft soaring.

- ESTABLISHED OVER THREE DECADES AGO, IN 1988
- ROBUST SOLUTION FOCUSED ON AND DESIGNED FOR THE AVIATION INDUSTRY
- MATURE & ESTABLISHED PRODUCT USED BY AVIATION OPERATIONS WORLDWIDE
- CUSTOMER LONGEVITY & LOYALTY WITH A COMPANY GOAL OF CLIENT SUCCESS
- FULLY SCALABLE SOFTWARE TO MEET THE NEEDS OF ANY SIZE OF BUSINESS
- EXTENSIVE DATA VALIDATION SO YOU CAN ALWAYS MAINTAIN COMPLIANCE
- UNLIMITED TAILS
- SOFTWARE AS A SERVICE (SAAS)
- KNOWLEDGEABLE IN-HOUSE TECHNICAL SUPPORT & PRODUCT SPECIALISTS
- SELF-SERVE LEARNING TOOLS VIA THE WINAIR HUB
- SOFTWARE THAT WAS DEVELOPED BY AVIATION INDUSTRY PROFESSIONALS
- ONGOING UPDATES AND ENHANCEMENTS IN NEW SOFTWARE RELEASES

WinAir Owner/Founder, Bert Vergeer, accepts his Aircraft Maintenance Engineers Hall of Fame Award from AMEC President, Sam Longo

OUR PACKAGES

Let WinAir streamline your processes, improve the accuracy of your reporting, and find savings in your maintenance budget. No matter your operation's size or industry type, we have the right package for you.

Explore our available software packages and contact us today to learn more about how your business will benefit from WinAir.

OPERATOR PACKAGE

From managing aircraft maintenance programs to overseeing planning, technical records, production activities, inventory control, purchasing, job costing, and much more, this software package satisfies the requirements of operations of any size.

HELIOPS PACKAGE

Civil and military helicopter organizations require unique solutions to manage complex counters, variable cycles, and dynamic components, so that they can always be mission-ready.

MRO PACKAGE

By providing MROs with the tools necessary to effectively manage all aspects of a customer's aircraft visit, from the initial planning and maintenance activities, and through to the final invoicing stage, this packages offers them a competitive edge.

ALL INCLUSIVE PACKAGE

Sometimes, you just want it all. Your business is expanding, your procedures are unique, and your needs are high priority. You need a solution that will satisfy current demands, accommodate future growth, and will manage all aspects of your daily operation.

BENEFITS OF WINAIR

You have the opportunity to elevate your business with WinAir. By automating your processes, you can achieve:

- LEAN, YET PREPARED INVENTORIES
- INCREASED VALUE OF AIRCRAFT & ASSETS
- MAXIMIZED COMPONENT SERVICE LIVES
- INCREASED ACCURACY OF INVOICES & JOB COSTS
- NO FAULT FOUND AUDITS
- REDUCED OPERATIONAL REDUNDANCY
- IDENTIFIED WARRANTY CLAIMS
- CAPTURED INEFFICIENCIES
- ESCALATED MAINTENANCE PROGRAMS

KEY FEATURES

Since day one, WinAir has played a pivotal role in shaping the aviation industry. Today, we continue to lead the way - staying ahead of technological advancements and setting the standard for aviation maintenance software.

- DIGITAL SIGNATURES
- FLIGHT LOG INTEGRATION
- UNLIMITED AIRCRAFT TRACKING
- AIRCRAFT TEMPLATES
- AIRCRAFT COMPLEX COUNTERS
- ASSEMBLY MANAGEMENT
- COMPLIANCE MANAGEMENT
- RELIABILITY REPORTING
- INVENTORY FORECASTING
- ACCOUNTING PORTAL INTEGRATION
- AIRCRAFT PART SALES
- DOCUMENT MANAGEMENT
- REPLENISHMENT TRIGGERS
- INVENTORY QUARANTINE
- CRADLE-TO-GRAVE TRACKING
- REAL-TIME LABOR TRACKING
- STAFF QUALIFICATION MANAGEMENT
- AND MUCH MORE

OUR SERVICES

At WinAir, experience our professional services which expedite the transition to the software, relieve staff of a variety of administrative and technical duties, and save businesses valuable time.

PROCESS CONSULTATION

Discover how our complete end-to-end assessment can improve your business and boost overall efficiencies.

PROJECT MANAGEMENT

Have our dedicated project management team guide you through a seamless WinAir implementation process where we use planning tools to ensure you're on track every step of the way.

CUSTOMIZED TRAINING

Learn through our multi-tiered approach to training that is tailored to your business' unique needs and particular budgetary requirements. Our team offers both in person and online training and support.

AIRCRAFT TEMPLATE SERVICES

Have our Technical Services team translate manufacturer maintenance requirements into accurate electronic templates for any fixed-wing or rotary-wing aircraft.

HOSTING

Trust in our experienced IT team and protected cloud environment to keep your data safe, secure, and always available from anywhere in the world.

DATA MIGRATION

Allow our team to expedite the implementation process by performing the compliance records and inventory data import into WinAir.

INTEGRATIONS

Connect WinAir with your accounting software and flight ops system to improve operational transparency and increase efficiency on maintenance tasks.

CLIENT SUCCESS

We pair-up WinAir clients with a dedicated Client Advocate, provide access to telephone, email, and an online help desk for technical support, and facilitate User Summits in Canada and Australia.

USER TESTIMONIALS

WinAir has a long-standing history of supporting client success. We listen to our clients and remain committed to assisting them with reaching their operational goals.

SUNWEST AVIATION

"We use the Flight Readiness dashboard every single day. It's the first thing I look at in the morning, and it's what we use in our daily crew chief meetings. All the crew chiefs sit around the table and we put the dashboard up on the big screen. Being able to hover over the aircraft and instantly see all the open tasks is huge — it's become part of how we run the operation. Honestly, it's total truth: we depend on it every day."

Mark Wildman | Manager, Quality Assurance

SUPERIOR airways

"The training was great — I wish we'd done it sooner. Having a WinAir Trainer explain everything in person made all the difference. Since switching to Version 7, tracking is smooth, pilots can see what's due, and the system is simple and clear for everyone."

Aaron LeBlanc | QA

omni táxi aéreo

"We are now using WinAir to its fullest and it's controlling our core business. Without the APIs, this couldn't have been possible."

Cristiano Porto de Sant'Ana | Gerente Sr de TI

AIRSPRAY AIRTANKERS

"We reviewed all the software products we could find on the market at the time (1998). When we talked to other operators about what they used, we kept hearing about the WinAir product and that the support was very good...This is still true today, as there is always someone to talk to when we need assistance."

Darcy Garrett | Director of Planning

CASE STUDY

Global Aviation Services Inc.

CHALLENGE

Global Aviation Services Inc. struggled with limitations of their on-premise system as they faced constant IT issues due to managing their own server and VPN, in addition to unreliable remote access for their satellite bases. Limited formal training on the previous version also led to the underuse of features, resulting in inefficient workflows.

OBJECTIVE

To move into a more modern, streamlined environment which could support their operation, Global Aviation Services Inc. was seeking to upgrade to WinAir V7.

With WinAir V7's cloud-based platform, the company could eliminate server and connectivity challenges. Additionally, their team could complete structured training available through the WinAir Academy to ensure the team was trained properly while offering an opportunity to reset their processes.

RESULT

The upgrade to WinAir V7 significantly increased efficiency for the team. With cloud access, team members are able to troubleshoot and respond to issues from anywhere, while also using more intuitive reporting tools like Planning Forecast and Maintenance Sticky Report to save time while easily making task documentation.

Aside from the available tools, the team was set up for success due to new training providing consistency and trackability, which improved overall understanding on how to use the system. Using WinAir Academy's quizzes and certificates has also helped to ensure their team meets regulatory training requirements so they can continue to stay in compliance with regulations.

PROFILE

MRO that services rotary, turbo prop, corporate jets to commercial aircraft home.

LOCATION

Halifax, Nova Scotia, Canada

"As our MRO and CAMO services expand, WinAir gives us the structure to scale.

Standardized templates, better training, and streamlined workflows help us bring on new aircraft types more efficiently.

Moving toward digital records and document management will further reduce paper reliance and strengthen our audit readiness.

WinAir is a key part of our growth strategy."

Marc Swanson
Quality Assurance Manager

PARTNERSHIP

Aircraft Industries, a.s.

Kunovice, Czech Republic

WINAIR ANNOUNCES STRATEGIC PARTNERSHIP WITH AIRCRAFT INDUSTRIES, A.S. IN THE CZECH REPUBLIC

WinAir, the global leader in aviation maintenance and management software, is pleased to announce a new strategic partnership with Aircraft Industries, a.s., the Czech Republic's premier aircraft manufacturer and producer of the renowned L 410 series of aircraft.

This collaboration marks a significant milestone in enhancing the digital transformation of Aircraft Industries' maintenance and continuing airworthiness management operations. By implementing WinAir's industry-leading software solution, Aircraft Industries will streamline its maintenance processes, improve operational efficiency, and ensure compliance with international aviation standards.

"We are thrilled to partner with Aircraft Industries and support their commitment to excellence in aircraft maintenance and continuing airworthiness management," says Jason Street, Business Development at WinAir. "This partnership reinforces our shared vision of modernizing aviation workflows with reliable, proven technology."

Through this alliance, Aircraft Industries will gain access to WinAir's comprehensive suite of tools, enabling real-time tracking, robust reporting, and seamless integration across departments.

"WinAir will help our AMO and CAMO teams in Aircraft Industries work smarter and faster by providing clear, real-time control over airworthiness and maintenance data," says Jíří Urban, Maintenance Planner of the Maintenance Department at Aircraft Industries. "It reduces administrative workload, improves planning accuracy, and allows our specialists to focus more on aircraft safety and less on paperwork."

This partnership underscores WinAir's continued global expansion and its commitment to empowering aviation organizations with powerful, user-focused software solutions.
