

# WINAIR VERSION 7 FLIGHT LOG INTEGRATION

Our Flight Log Integration dynamically receives flight log data from your Flight Ops system and adds it directly to the aircraft in WinAir, saving you time and improving operational efficiencies. This integration also sends maintenance dispatch data from WinAir to your Flight Ops system.

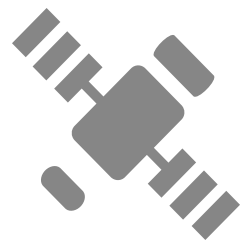

By providing instant access to flight log information, this integration improves maintenance planning and forecasting and assists with curtailing AOG situations.

## THE FLIGHT LOG INTEGRATION WORKFLOW

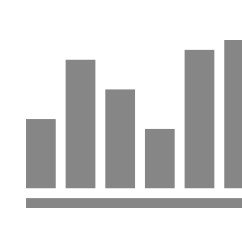

AIRCRAFT

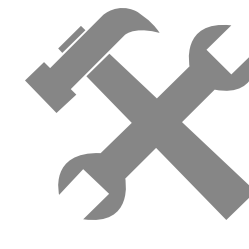

SAT/COM  
SYSTEM

FLIGHT OPS  
SYSTEM

API DATA

WINAIR  
VERSION 7

### INCREASE PRODUCTIVITY

- » Streamline and automate workflows
- » Eliminate Manual Data Entry
- » Harmonize Maintenance and Flight Ops
- » Expedite maintenance job completion

### IMPROVE PROCESSES

- » Send next due/tech dispatch data
- » Transfer flight log and counter values
- » Account for penalty factors
- » Maintain and prove compliance

### PROVIDE INSTANT ACCESS

- » No waiting for pilot flight log hours
- » Access to values per flight log input
- » Pilots receive dispatch info before flights
- » Eliminate flight log data entry errors
